FedRAMP

FEDRAMP
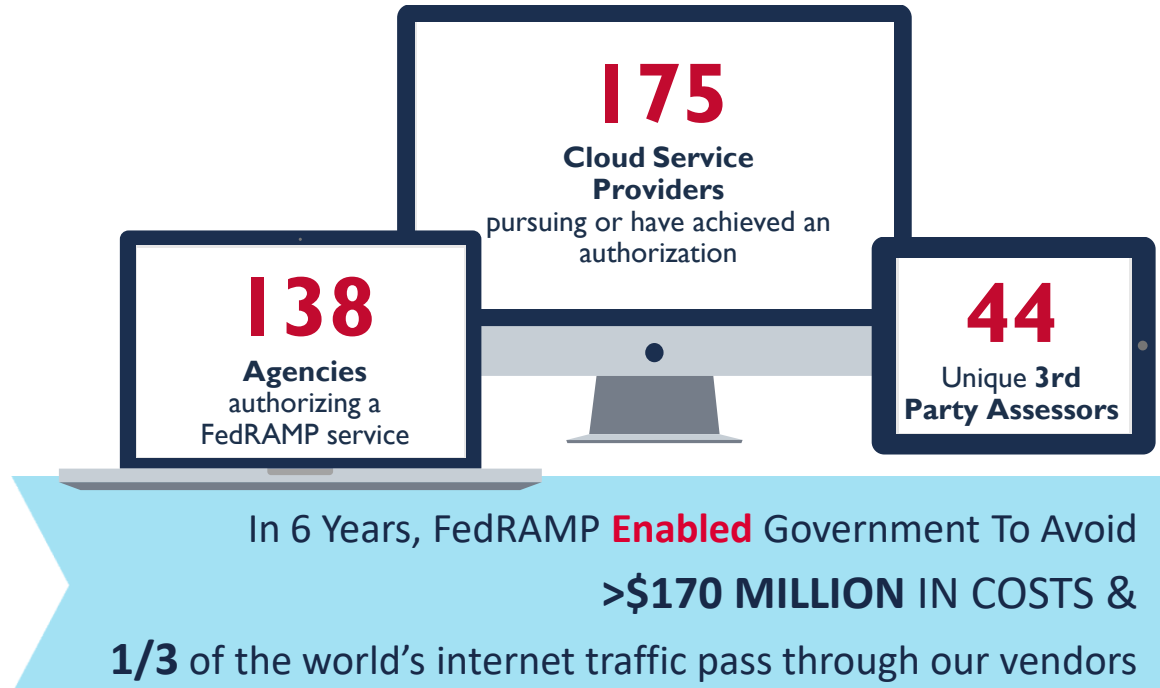

JUNE 2018

FedRAMP was created out of the U.S. Government's Federal Cloud Computing Initiative to *remove the barriers* to cloud adoption
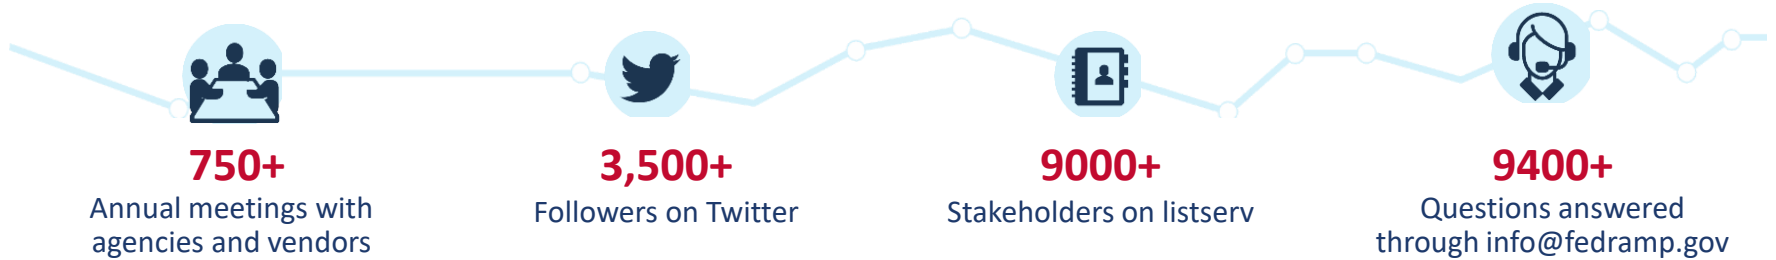

FedRAMP's Goals

o Ensure the use of cloud services **protects** federal information

o Enable **reuse** across the Federal government wherever possible to save money and time

175
Cloud Service Providers
pursuing or have achieved an authorization

138
Agencies
authorizing a FedRAMP service

44
Unique **3rd Party Assessors**

In 6 Years, FedRAMP **Enabled** Government To Avoid

>$170 MILLION IN COSTS &

1/3 of the world's internet traffic pass through our vendors

POINTS OF CONNECTION

750+
Annual meetings with agencies and vendors

3,500+
Followers on Twitter

9000+
Stakeholders on listserv

9400+
Questions answered through info@fedramp.gov

COMMUNITY ENGAGEMENT

AGENCIES

CSPs

2018 is "The Year of Refinement" for FedRAMP

MORE CLOUD TO CHOOSE FROM

- Increase Authorized Cloud Services
- Increase Re-used Authorizations
- Convert FedRAMP-Ready CSPs to In-Process or Authorized CSPs

TRANSFORM SECURITY AUTHORIZATIONS

- Automate the Authorization Process
- Continue to push FedRAMP Tailored Authorizations

STRONGER FEDRAMP COMMUNITY

- Connect the Community Through Industry and Agency Days
- Enhance 3PAO Resources with Updated 3PAO Requirements
- Promote Better Understanding of FedRAMP and the Authorization Process

June is a busy month for the FedRAMP Program!

New FedRAMP Training Platform and 300-Level Course: We're launching a new Training Platform, which will provide a cohesive view of the FedRAMP curriculum and provide a quality user experience.

3PAO Requirements Release: We received feedback on the draft R311 requirements. We're reviewing the feedback, and will release the finalized R311 requirements sometime in the coming weeks.

Authorization Boundary Guidance and Feedback: We released guidance on authorization boundaries to educate CSPs, Agencies, and 3PAOs and inform their creation and review of these boundaries.

Readiness Assessment Report (RAR) Template Update and Webinar: We will be releasing an updated RAR template that provides guidance on describing and assessing risk associated with system interconnections, Application Programming Interfaces (APIs), and external services. We will be hosting a webinar on the update this summer that will include time for Q&A.

FedRAMP Connect: The next round of FedRAMP Connect, where we prioritize CSPs to work with the JAB toward a Provisional Authority to Operate (P-ATO) will begin within the next couple of weeks.
