

Innovative GEOINT Application Provider Program (IGAPP)

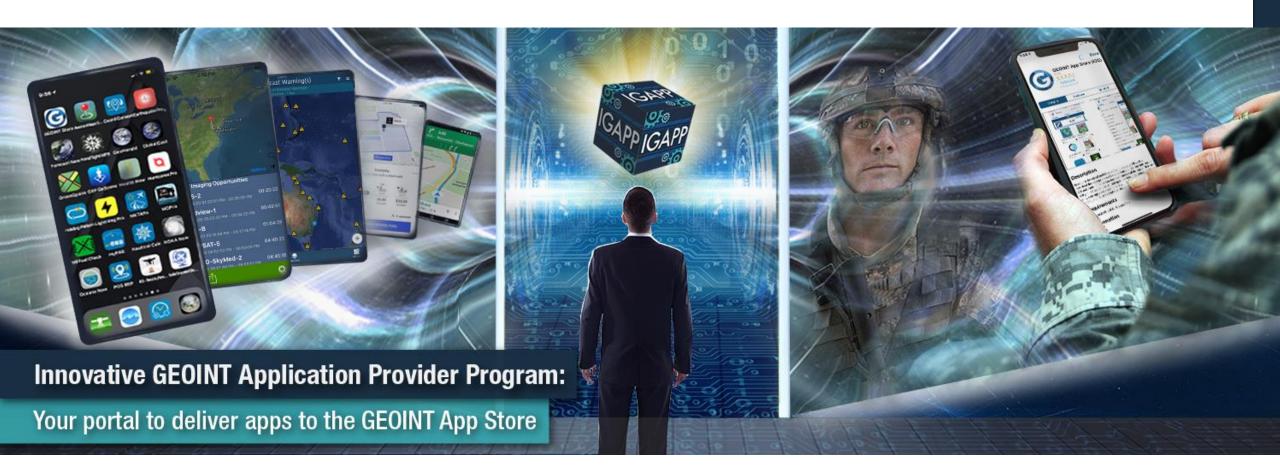

Outreach Overview Brief 22 Aug 2018

The overall classification of this presentation is: Approved for public release, 17-711

Agenda

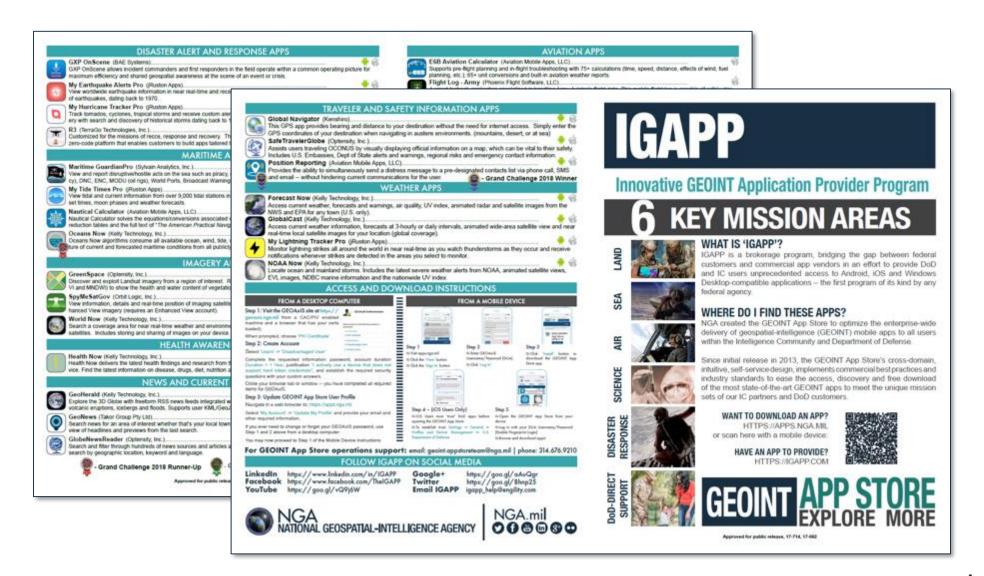

- Outreach Overview
- Marketing Documents
- Vendor Opportunity Packages (VOPs)
- User Outreach Efforts
- IGAPP Social Media
 - IGAPP "In the News"
- Future Marketing Events
- Contact Information / Questions

Innovative GEOINT Application Provider Program (IGAPP)

Marketing Documents - Apps Available Brochure

Approved for public release, 17-711

Marketing Documents - Travel Apps Postcard

ABOUT GEOINT App Store

NGA created the GEOINT App Store to optimize the enterprise-wide delivery of geospatial-intelligence (GEOINT) mobile apps to users within the Intelligence Community (IC) and Department of Defense (DoD). The GEOINT App Store implements commercial best practices and industry standards to ease the access, discovery and download of the most state-of-the-art GEOINT apps meeting the unique mission needs of IC partners and DoD customers.

Position Reporting

Provides the ability to instantly send a distress message to a customized contacts list via phone call, SMS and email without affecting current communications in use.

SafeTraveler Globe

Assists users traveling OCONUS by visually displaying U.S. Embassy locations, Dept of State alerts, warnings and regional risks on a map.

Offline GeoPDF map viewer with an in-app map store providing access to thousands of professional maps for team navigation, awareness and safety of travel.

Approved for public release, 18-464

Vendor Opportunity Packages (VOPs)

Unexploded Ordnance (UXO) Location Information App

VENDOR OPPORTUNITY PACKAGE (VOP)
Innovative GEOINT Application Provider Program (IGAPP)

WHAT IS IGAPP

IGAPP is a brokerage program, bridging the gap between federal customers and commercial app vendors interested in using the National Geospatial hittlegence Agency (NGA) database of geospatial information to solve problems supporting vital and fascinating missions.

App vendors are compensated through IGAPP using a market-driven compensation model. Developers provide their IGAPP apps and innovative app ideas to turn government customer needs, problems, and challenges into safe, tested apps for the GEOINT App Store. In return, IGAPP app developers will have access to NGA's data, expertise and customers.

BACKGROUND

The detection and mapping of unexploded ordnance (UXO) is a critical issue for a variety of potential users ranging from military personnel responsible for force protection on military bases to military, United Nations, and /or emergency response personnel operating in war forn or war ravaged regions of the world. It is critical that personnel have the capability to quickly and reliably survey areas where munitions or ordinance were known or suspected to be used to identify and map any potential hazards, and support the avoidance and safe removal of those potential dangers.

APP NEED

The DoD is seeking an app that will support the geolocation of both land-based and underwater unexploded ordnance or other explosive devices. The app must allow for manipulation of location overlays. Ideally, the app would also support near-real time communication between field-based handheld devices and a Command Center via low bandwidth connections to allow for situational reporting on a regular basis. The finalized application will go through the IGAPP process and be made available for customers of the GEOINT App Store.

MARKET

This app will appeal to force protection and explosive ordinance detection officers of all US armed forces, international FP and EOD personnel supporting the United Nations and other countries, as well US and international hazard assistance and disaster response personnel (HADR). Initially, the potential number of users is expected to be on the order of several thousand, and could ultimately expand to 450,000+.

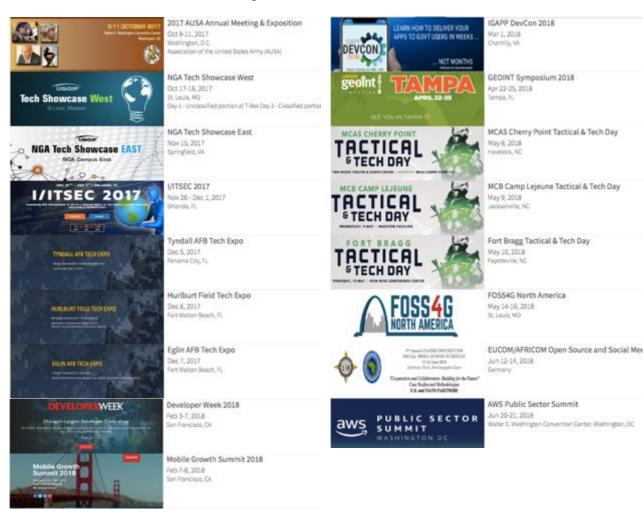

Approved for public release, 18-127

#1 – Grand Challenge 2018 (80K Views)

#2 – References to Media (Wired Magazine)

#3 – New App Announcements

IGAPP in the News – Wired Magazine Article

4 Followers, 600+ Views

- Top Post viewed by IC and DoD personnel
- Article directly responsible for driving more than five new vendors to register as IGAPP Approved Vendors
- Shared/Re-Tweeted by NGA OCC
- Highlighted in "NGA in the News" portion of NGAToday on 5 July

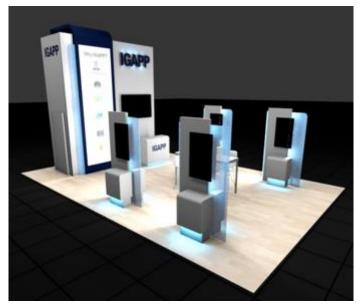

Future Marketing Events

Concept:

IGAPP Approved Vendors join the IGAPP team at a future event

Benefit:

- Utilize additional resources to grow discoverability of apps in the GEOINT App Store and help grow sales for vendors
- Larger visibility at an event for a fraction of the cost
- Apps for all mission areas on display

Future Marketing Events

Logistics:

- Eligible participants include IGAPP Approved Vendors with app(s) in the GAS
- Demo area for each participating vendor
- IGAPP Branding
- NGA IGAPP Lead on hand for bulk purchases/MIPR requests?
- Equal Opportunity for all Approved Vendors to participate (first come first serve)

Vendor Stipulations:

- 1-2 vendors per demo space
- Limited self-branding
- Marketing of other products besides GAS app(s) prohibited
- Coordinated approach amongst vendors
