

ZL Tech for Federal Agencies

A New Era of Trusted Mission Intelligence

Intelligence without Duplication

Federal agencies hold vast stores of information in emails, chats, files, and archives. Within that data lies the intelligence that drives every mission. Most platforms require copying and moving information, adding complexity and delay. ZL Tech connects directly to data where it resides, governing and analyzing it in place for instant insight and control without duplication or disruption.

- ✓ **Cut the Wait, Cut the Waste:** Reduce delays, costs, and risk by analyzing information instantly where it already lives.
- ✓ **Less Copies, Less Chaos:** Eliminate redundant data stores and the disruption caused by replication.
- ✓ **Scale Without Limits:** Manage billions of records across networks, clouds, and archives with ease.
- ✓ **Search at the Speed of Thought:** Deliver answers across vast repositories in seconds to support confident mission decisions.

Governance that Enables Possibility

Governance is not a constraint; it is the structure that gives data value. For over 26 years, ZL Tech has embedded governance guardrails into agency information management, turning raw content into reliable intelligence. When policies and control are applied from the start, records management becomes seamless, and AI can operate on data that is accurate, complete, and compliant.

- ✓ **Built-In Trust:** Every record carries the context required for confident decisions.
- ✓ **Active Governance:** Turn policies into frameworks that prepare data for analytics and AI.
- ✓ **Seamless Compliance:** Integrate privacy, classification, and retention into daily workflows.
- ✓ **AI-Ready Data Fabric:** Deliver curated, policy-aligned information that feeds AI systems with integrity.

Capabilities

Unified Data Governance

Power analytics, compliance, and mission awareness directly from data where it resides.

Global Search

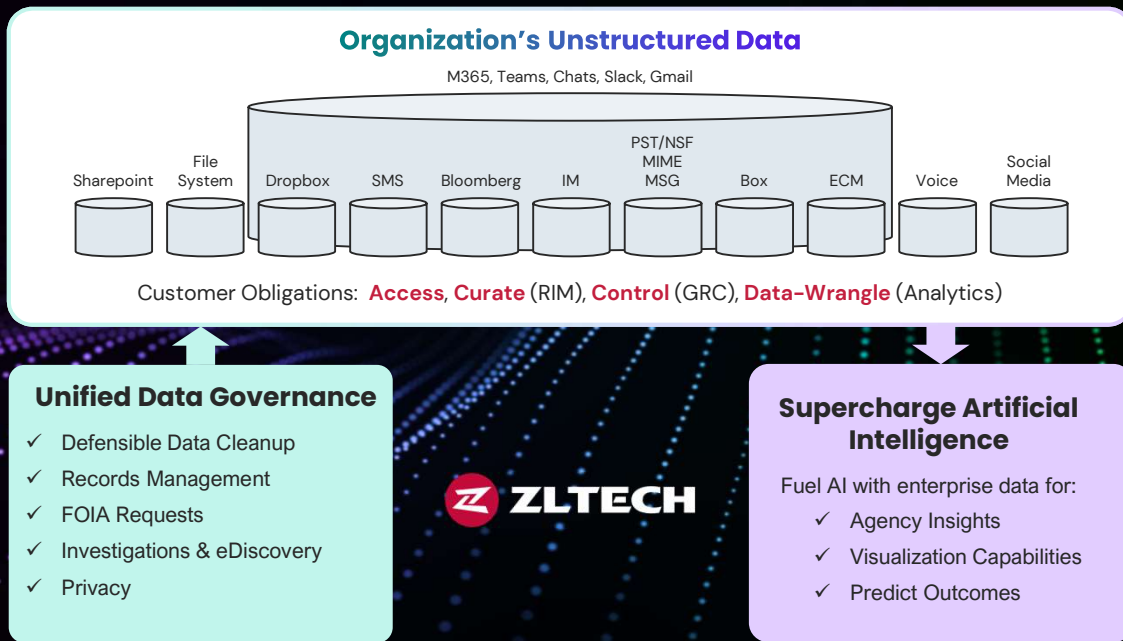

In-place search and analysis for eDiscovery, FOIA requests, and internal investigations.

Intelligent Disposition & Risk Reduction

Automate retention, audit logging, and defensible deletion to meet zero-trust and insider-risk mandates.

AI Readiness

Prepare and protect sensitive content for AI and analytics, ensuring only governed, compliant data feeds your models.

From Ingestion to Insights: Complete Data Control

ZL Tech seamlessly connects to data sources across the agency's ecosystem, providing a unified platform for comprehensive governance guardrails. Designed to meet the most stringent Governance, Risk, and Compliance (GRC) requirements, ZL Tech's highly scalable architecture ensures organizations remain compliant while minimizing risk.

Beyond governance, the platform simplifies data curation, enabling organizations to extract actionable insights and unlock the full potential of AI and advanced analytics—all from a single, secure solution.

Platform of Choice for Federal Agencies

Trusted by NARA

Selected to establish the Capstone standard for federal records management.

Security as a Core Value

- ✓ FedRAMP In Process
- ✓ HIPAA Compliant
- ✓ SOC2
- ✓ Pursuing IL5 under sponsorship from federal mission owners
